EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE SPECIFICATIONS

On page 1, in the section "CROSS-REFERENCE TO RELATED U.S. PATENT APPLICATIONS", after "October 9, 2002", insert -- , now Abandoned —.

IN THE CLAIMS

In claim 3, line 5, delete "see" and substitute thereof "seed".

2. The following is an examiner's statement of reasons for allowance:

Prior art such as Löhr et al. (US 4,395,500), Siol et al. (US 4,456,726) and GB 1419145 teach aqueous dispersions of bimodal polymer particles, however they do not teach a process for preparing a latex by the emulsion polymerization in the presence of a surfactant and polymer seed particles, wherein the polymer seed particles have diameters between 200 and 450 nm and represent from 5 to 25% by weight of the solids, especially wherein the system is initiated with the combination of water-soluble and fat-soluble initiators.

Jakob et al. (US 5,889,107) teaches a process for the preparation of a polymer dispersion by seed emulsion polymerization, where a mixture of water-soluble and fat-soluble initiators may be used. However, the seed in Jacob et al. is not a polymer particle, but a hydrosol complex of an organic acid metal salt stabilized with a protective colloid.

No prior art was found to teach or sufficiently suggest all the elements of the process in the present claims, nor the latex products of said process.

Thus, claims 3-13 and 16-28 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Kelechi C. Egwim whose telephone number is (571) 272-1099. The examiner can normally be reached on M-T (7:30-6:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu can be reached on (571) 272-1114. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
